

## **iCALIBER SMA RF Test Cables**

Aeroflex / Inmet is pleased to announce the release of the first series of the **iCALIBER** family of test cables. The **iCALIBER** brand combines the quality and performance of a high end test cable with the low cost of ownership normally reserved for economy grade test cables commonly found in the marketplace. Normal failures due to crushing, flexure and kinking are eliminated through the use of a robust spiraled stainless steel casing. These cable assemblies allow for a small bend radius with minimal spring back and exhibit low loss and VSWR characteristics while providing excellent phase stability.

A simple monolithic pricing structure is offered for ease of purchase and a discounted price is offered when cables are returned for reconstruction. Reconstructed cables contain new cable and connectors and reuse the spiral casing.

For further information, contact [inmet-sales@eroflex.com](mailto:inmet-sales@eroflex.com).

The data sheet for these exciting new cables can be downloaded at:
