

## Money-saver Type N Attenuator operates DC to 6 GHz

These newly designed 9070 series of 2 Watt Type N Attenuators provide money-saving solutions for volume applications while providing extraordinary performance from DC to 6 GHz with a 1.25:1VSWR. The units are available in 1-10dB (in full dB increments) and in 15 and 20 dB attenuation values. They are ideally suited for WiFi and indoor distribution applications, Wireless LAN, Wireless infrastructure and E-911 Kits. They are RoHS compliant and meet the shock and vibration profiles required in MIL-A-3933. For a Data Sheet, visit .

Aeroflex / Inmet is a manufacturer of rf, microwave and wireless components including attenuators, terminations, cable adapters, bias tees, DC blocks, and gain equalizers.
